1. INTRODUCTION

1.1 OVERVIEW

The Cokey – A Handy UVC Sterilizer that Kills up to 99.9% of germs and COVID 19 virus within 10-30 Seconds. Considering the Pandemic Covid19, a four Technocrats of Pincore with decades of experience has designed the hand held device which is ultra-portable. The Compact Product is Convenient to carry around and can sterilize anytime & anywhere which kills COVID-19 on large everyday items, devices or surfaces with an easy reach.

Ultraviolet light has been used from decades to stop microorganisms spread that cause diseases. So, in today's life the most dangerous virus behind the pandemic is COVID-19.

Does UV light kill Coronavirus?

And the answer is Yes! but the main focus is that, the right dosage of UV light should be fed to the virus.

Ultraviolet is that part of electromagnetic radiation bounded by the lower wavelength extreme of the visible spectrum and the upper end of the X-ray radiation band. The spectral range of ultraviolet radiation is, by definition between 100 and 400nm (1nm=10⁻⁹m) and is invisible to human eyes. UV spectrum is subdivided into three bands:

- 1) UV-A (long-wave) from 315 to 400 nm
- 2) UV-B (medium-wave) from 280 to 315 nm
- 3) UV-C (short-wave) from 100 to 280 nm

UV-C is a type of ultraviolet light that has wavelengths between 200 – 280 nanometres (nm). Light within those wavelengths can be used for disinfection any surfaces or things around you.

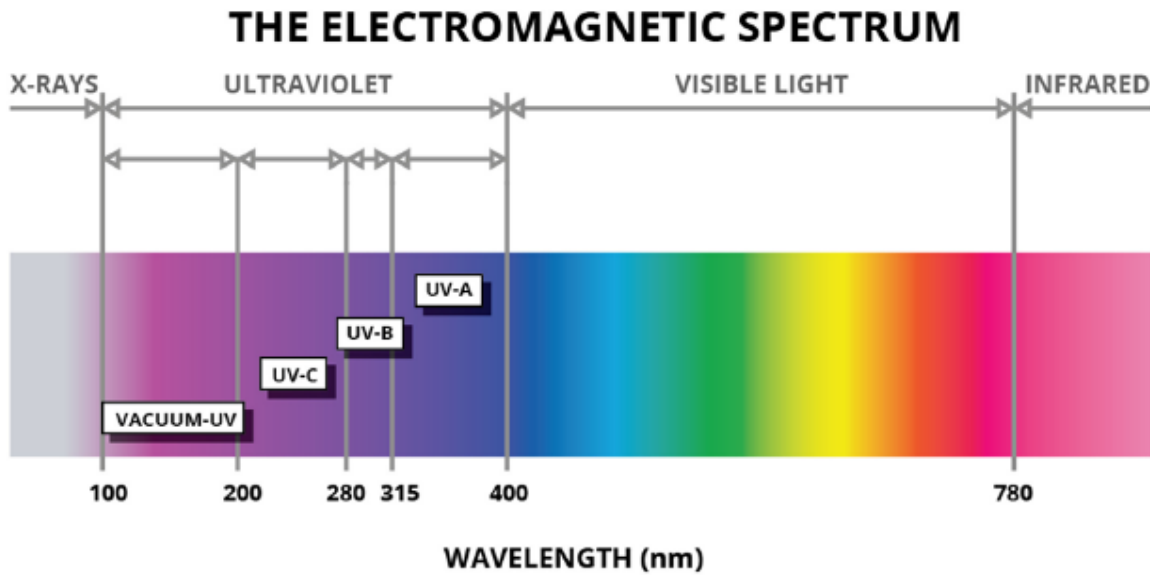

Figure: Displays the different Wavelength of Electromagnetic Spectrum

Before exploring the product technically, lets us understand how UVC impacts or influence towards disinfection of the COVID-19.

Doctor Say's "When the bacteria, viruses and protozoa are exposed to the germicidal wavelengths of UVC light, they are rendered incapable of reproducing and infecting"

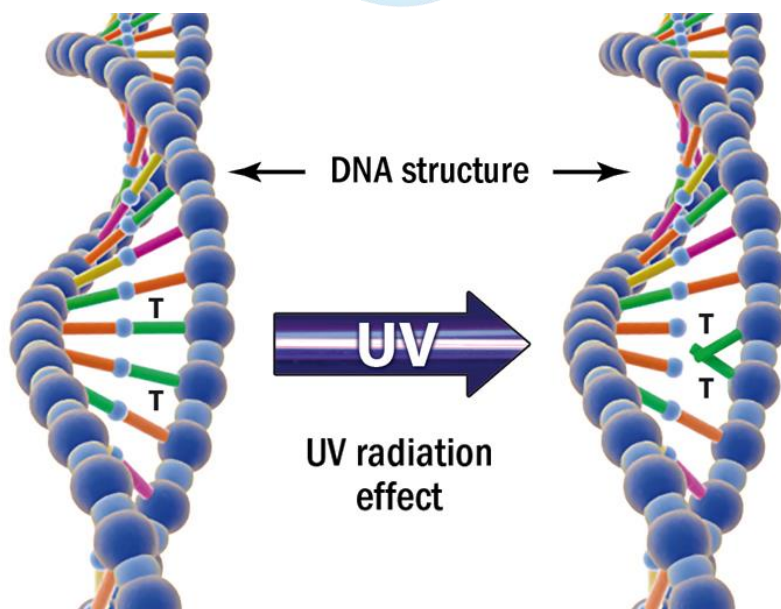

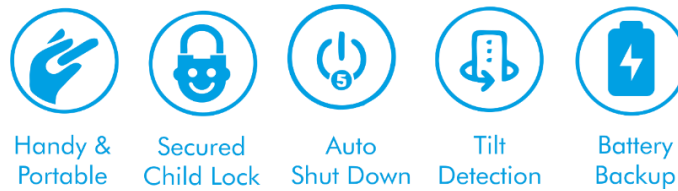

Figure: DNA Structure view of before & after UVC radiation effect

Going further into attributes, whenever the organisms are exposed to UV light, this UVC first targets the Deoxyribonucleic acid (DNA), Ribonucleic acid (RNA) and proteins of the microbe. The targeted area which is exposed to UV light causes the formation of Thymine dimers which acts as an anti-growth for organisms. When this growth increases, it starts to damage the DNA from inside which is known as Cellular Mutation. This process is non-repairable and therefore damages the organism at an extensive rate and it dies. At this stage the growth of organisms is stopped, DNA replication is stopped which results to no spread rate. Cells that cannot replicate, cannot infect. The technical term for this is “Deactivation.”

Protect your health and make your surroundings safer with the ultra-portable The Cokey which is UVC sterilizer. With its powerful and uses UVC technology which kills up to 99% of all germs, viruses and bacteria instantly.

1.2 FEATURES

1. Product utilizes the world's best performing UVC LED and non-hazardous eco-friendly technology to provide surface sterilization.
2. UVC LED's used in a product is a patented technology, Clinically Tested and FDA approved.
3. Handy & Portable – Pocket Size UVC Sterilizer to disinfect the viruses anywhere & anytime.
4. Clinically Tested UVC LED's – Clinically tested UVC LED's are used for Deep Sanitization that kills up to 99% of Corona Virus.
5. 99.9% Sterilization of coronavirus (COVID-19) in 10-30 seconds of recommended sterilization time.
6. Manual & Auto Mode – CoKey runs on own intelligent way using special sensors and also it can free run based on the customer usage.
7. Child Lock – Option to restrict kids usage on device.
8. Auto Power save mode for long run and fully Battery Operated with Auto Shutdown option.
9. Tilt Detection, Range Indicator and Many more excited features with integrated Technology.

1.3 KIT CONTENTS

In addition to these instructions, The Cokey kit contains one of each of the following items:

- ✓ UVC Scope which is The Cokey – A handy UVC sterilizer.
- ✓ User Manual with complete instructions to understand the product and its usage .
- ✓ A USB Cable which is utilized for charging the Battery.

1.4 DIFFERENT MODELS OF COKEY & ITS UNIQUE FEATURES.

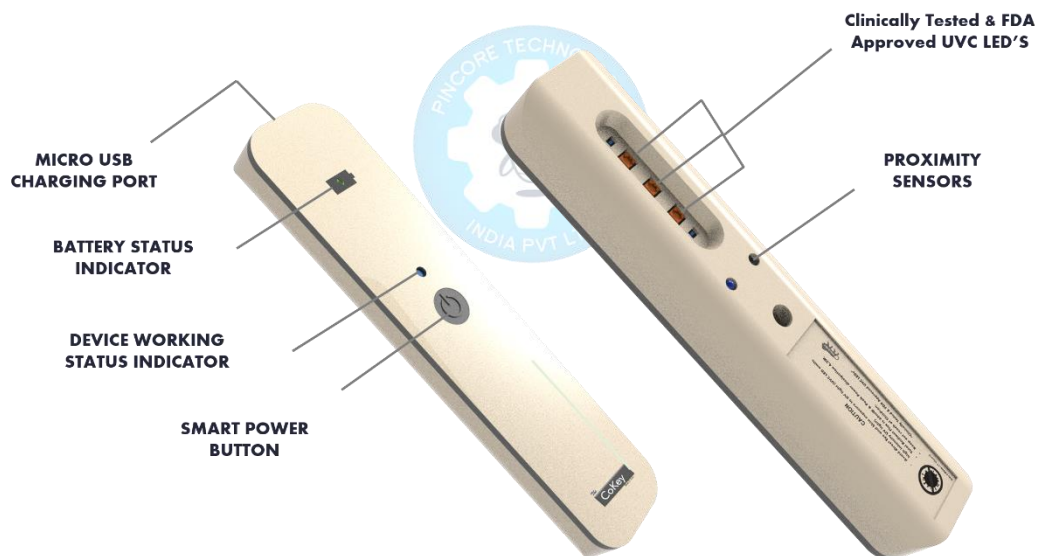

Figure: Unique Features of The CoKey

The product and its variants are designed and put forward for the society in which the aggregate of people living together in a more or less ordered community where lack of sufficient money and affordability is considered to be major role. The product has three main variants keeping the economic status of society:

The Cokey S

A basic model of the product with all the necessary features which is required to safeguard from any virus. The CoKey S is designed by considering the common man of the country and affordability. This model has same look & feel of pro version except some intelligent runs and key features.

The Cokey Pro

The CoKey Pro is a hot product which is in high demand with lot of expectation. And also at the time of trials and user experience testing we have seen a huge response for this model particularly every customer of us will be surprised with best price of it. This model can operate in both automatic and manual mode based on the user application. Additionally, a pro version has intelligent run like auto shutdown, power saving mode, Child Lock and Many more exciting features.

The Cokey Special Edition

A Premium version of the product, itself works like AI thinker which understands the intensity level of the virus and illuminates the UVC light on it. This Special edition is having a complete auto adjustment of light intensity according to the range detected by proximity sensor which is built in. Also without any additional effort automatically, device confirms the elimination of virus at the surface and turns the device off. CoKey SE comes along with all the Pro features like both Auto & Manual Mode, Power Saving Mode and child Lock. One Word about this version is exclusively built for tomorrow's world.

Kills COVID - 19 Virus

2. APPLICATIONS AND USAGE OF THE PRODUCT

The CoKey is designed in such way that every individual must carry everywhere for their self-protection from the most dangerous viruses. Hope you remember about the old days where you will carry your own pens in your pocket but unfortunately because of all these viruses and pandemic now it's a situation to carry medical safety devices. To be honest, this product is needed for everybody in the world who wants to live/work in people gathering places. But for your understanding let us explain you some of the areas where this is most needed in the day to day life.

1. **Day-to-Day Life:** The parcels/packages/baggage that come from outside has to be taken care if its sterilized and corona virus free, which can be a risked situation for family. Same thing applies for a person who goes to office daily and thinks if the work place is safe enough.
